- Row Housing

Building Construction Solutions

Industrial, Commercial, Residential, School Buildings, Roof-top Structures, Farm Houses & Villas, Site Offices, Labour Huts, Resorts, Rehabilitation Camps.

Reliability

An ideal Solution for Pre-Engineered Buildings

Zep Tech is one of the leading manufacturers of Pre-Engineered Steel Buildings and Prefabricated Shelters, which are suited for commercial, industrial and residential projects. Zep Prebuild Steel Building comes with optimized design resulting in cost effective viable solution.

Suitable for both light and heavy industrial structures.
In-house facility for efficient & customized design.
Computerized Engineering & design processes.

Advantages

- Single window Solution
- Economical and Cost effective
- Engineering flexibility
- Quick Project Construction
- Low Maintenance
- Provision for future expandability
- Energy efficient
- Architectural versatility
- Earthquake resistant designed for seismic zones

Salient Features

- Versatility
- Structural strength with lighter weight
- Aesthetically Appealing
- Suited for extreme weather conditions
- Proven Durability
- Speedy execution
- Consistant quality

Roofing & Cladding

Decking Profile

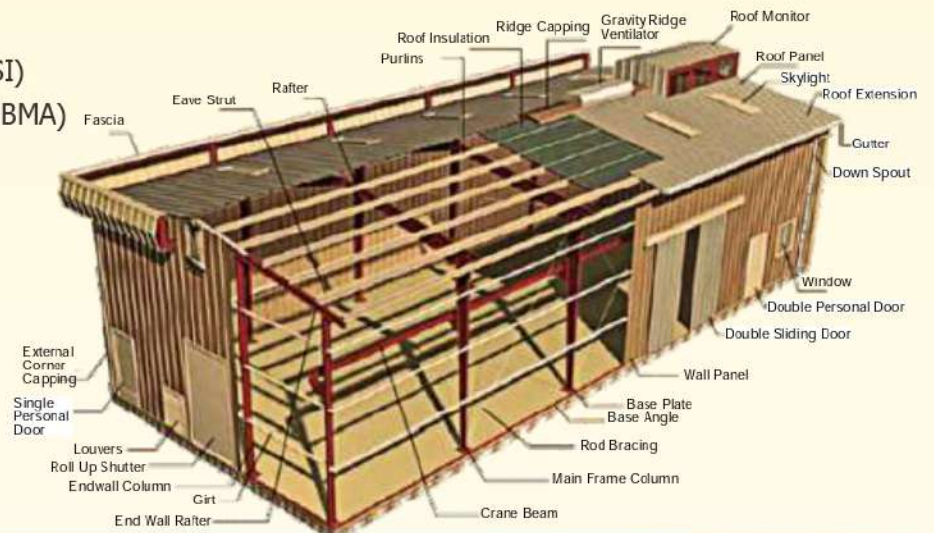

Roofing/Cladding Profile

- IS 875
- IS 801, 811
- IS 1984, IS 800 2007
- Cold form Steel design Manual (AISI)
- Low rise building system Manual (MBMA)

Types of Frames

Zep Prebuild Steel Buildings

Easy - Efficient - Eco Friendly- Green Building

ZEP Prefab

Engineered to perfection

Advantages over conventional construction

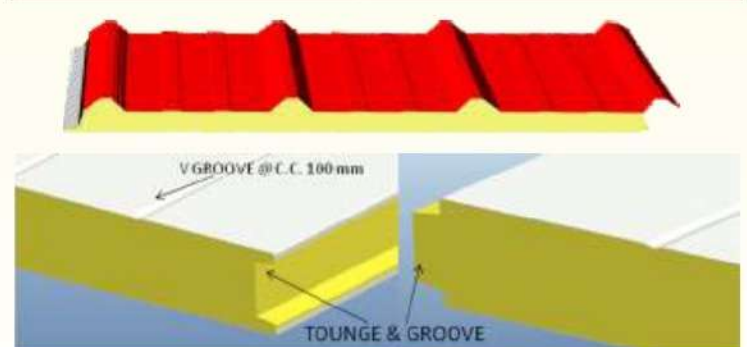

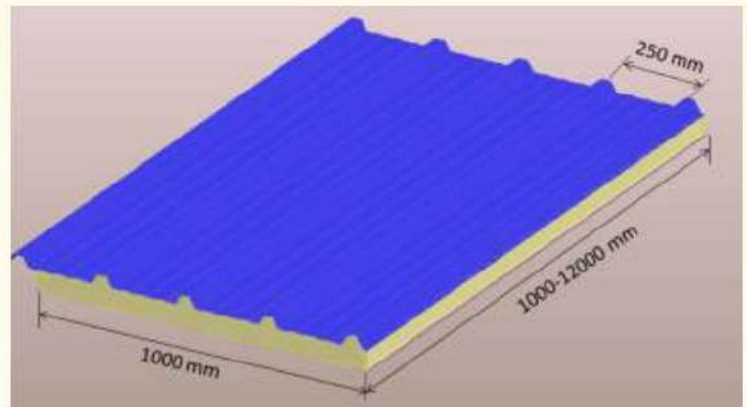

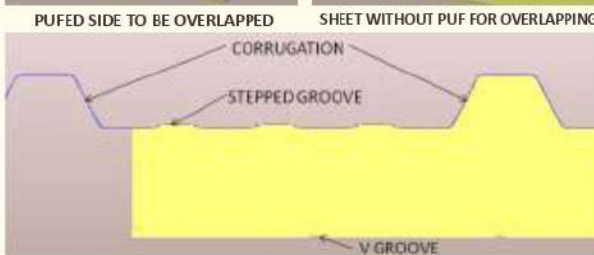

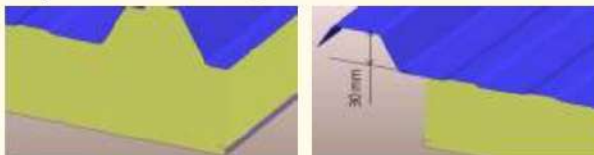

- Superior Thermal & Sound Insulation
- Quick to Install
- Customised Solution
- Consistent quality
- Reusable & Re-Locatable
- Easy to handle & expandable
- Eco friendly
- Easy to clean & maintain
- Fire resistant / retardant properties
- Cost effective & economical
- Elegant & light weight
- Option of joint-less single panel
- Designed to suit varying climate

Zep Prefab shelters are made of factory engineered PUF panels with PPGI skin on both sides (optional), filled with CFC free PUF / Rockwool insulation as a core material, by using high pressure state-of-the-art machinery. The sandwich PUF panels have tongue and groove arrangement with additional feature of cam-locks to provide additional strength to the joints.

PUF Panel :

- Up to 12meters in length and 1.198 meters in width
- Up to 8meters in length and 3meters in width

Wide option of skin material: Stainless Steel, Aluminium, FRP, GRP, Galvalume, Pre-laminated Board/Plywood, Cement Boards, Craft Paper etc.

- CFC free polyurethane foam - Energy efficient - Durable - Long service life.
