SMART SANITATION SOLUTIONS

SWACHH SWASTH SAMARTH BHARAT

"The absence of adequate sanitation has a serious impact on health and social development, especially for children. Investments in improving sanitation will accelerate progress towards the Millennium Development Goals and save lives." - Ann M. Veneman, UNICEF Executive Director.

It is a harsh reality that a large number of households in our country do not have proper sanitation facilities. This leaves no option for the people but to use open spaces. This unhygienic and unhealthy practice is also a major compromise to the basic human values. With "Swachh Bharat Abhiyaan" and other initiatives by the government

there is now a fervent desire to provide household sanitation facilities to every family.

With a view to contribute to Making India 'Swachh. Swasth. Samarth' (Clean. Healthy. Proficient) from the grassroots, Zep has developed a range of readymade and prefabricated sanitation products that are easy to install and are cost-effective. These contemporary solutions are way ahead of the conventional construction practices and solutions. This range of products is also a safer and more hygienic sanitary solution for geographically challenging locations.

MAKING INDIA CLEANER, GREENER AND SMARTER FROM THE GRASSROOTS

As India inches towards a new economic status in the global arena, grassroots development at the domestic front holds the key to sustaining its renaissance as a global power. Infrastructure development of macro and micro scales contribute to the transformation of the economy, substantiating growth and bringing about percolation of prosperity to all strata. Amongst the micro infrastructure, social infrastructure that caters to the underprivileged people's needs is revolutionizing India from within. Cost-effective, efficient, time-saving social infrastructure innovations from Zep does exactly that. It is ushering a silent revolution by introducing basic amenities to one and all, irrespective of their geographical and socio-economic position.

anganwadis, mass housing, water management and sanitation solutions et al ... the list has just started. As the nation identifies more areas of speedy and cost-effective infrastructure solutions, Zep is geared to provide it to the nation. Zep is committed to doing its part in building India making India a developed nation.

ENGINEERING BETTER AND BRIGHTER SOLUTIONS

To address the sanitation needs of the country, we have engineered a broad range of portable solutions. These products are manufactured in our world-class facilities and can be customized to meet your exact requirements.

Homes, shelters, offices, kiosks, hospitals,

The Portolet Portable Toilet, Bathroom & Urinal is truly a distinct product that blends utility with aesthetics. To add more value, these solutions are crafted to offer low maintenance and longer services.

The Portolet range of Portable Toilet, Bathroom and Urinal is perfect for areas like individual homes in India and abroad, construction sites and large gatherings. The attractive prices of this range will surely help to address the sanitation goals of our country.

Aesthetic

Children are our future. It is important to guide them with the right sanitation and hygiene practices in schools. Lack of sanitation facilities is also one of the reasons for boys and girls dropping out of schools. Moreover, well aware children can inspire right sanitation practices in their homes and in surrounding areas. Thus there is an urgent need for safe, hygienic and separate toilet facilities for girls and boys in schools across the nation.

To help schools, municipalities and state governments, we have developed prefabricated school toilets according to Ministry of Human Resource Development (MHRD) guidelines. Easy to erect and maintain, our prefabricated toilets are surely a great way to solve the problem of sanitation in schools.

SCHOOL SANITATION
